

## **CARE OF CELLAR BEETLES**

- Water
  - Ensure sponge is kept wet, but not overflowing with water
- Food
  - Check the dry food daily. Change or top up as needed
  - Fresh fruit or veg can be added, remove when it has dried up or looks bad
- Cleaning
  - Make sure any bad food is removed
- Handling
  - These animals are NOT to be handled
  - Bark can be carefully picked up so students can better see the beetles
