

CARE OF GIANT MILLIPEDES

- **Water**
 - Ensure sponge is kept wet, but not overflowing with water
- **Food**
 - Millipedes are composters, ensure that there are always oats in the bowl
 - You can add old leaves and some carrots for them to compost as well
- **Cleaning**
 - No cleaning required on loan
- **Handling**
 - These animals can be handled by adults for short periods of time,
 - Adults can carefully remove bark so students can have a closer look at the centipede
 - Students are NOT to touch the millipedes
- Please make sure no cleaning supplies are sprayed around these animals
