

# CARING FOR GREEN TREE FROGS

- **Water**
  - Ensure the empty section of the enclosure is filled three quarters full. Add tap water conditioner as per instructions on the bottle.
- **Feeding**
  - Feed the frogs 2-3 mealworms each, minimum 3x week (Monday, Wednesday, Friday). Dust the mealworms with the supplement provided
  - Our frogs are fat enough to last 2 months without food, so if they don't eat, don't worry.
- **Heating**
  - Place the water bottle with the water heater inside it in the water at the back of the enclosure, make sure this is always kept on.
  - There is a slit in the lid for the cord to go through
- **Handling**
  - Only adults are to pick the frogs up, ensure hands are wet when doing so.
  - Frogs can be placed inside the container provided, with a thin layer of water. Children can then look at the frogs closely through the container
- Frogs are sensitive to chemicals, please make sure cleaners aren't spaying cleaner/sanitiser near the frogs
- Ensure frogs are returned in the container provided
- Frogs must be checked at least once over the weekend
