

CARE OF LOCAL FROGS

- **Water**
 - Ensure water bowl is cleaned and refilled every day
- **Food**
 - Feed 2/3 mealworms per frog 3 times a week (Monday, Wednesday, Friday). Sprinkle insectivore on top of mealworms
 - Any uneaten mealworms can be replaced into the container
- **Cleaning**
 - Ensure water bowl is always kept clean, but don't use any chemicals when rinsing it off.
 - If any water tips over, remove the wet dirt
- **Handling**
 - Adults only can carefully pick the frogs up with wet hands
 - Handling should only be done to place frogs into the container for transport
- Frogs need to be checked at least once over the weekend
- Ensure no cleaning chemicals are sprayed anywhere near the frog enclosure as they are very sensitive to chemicals
