5	Adaptations to survive. Units 5 and 6	<ul style="list-style-type: none"> <li>• Adaptations</li> <li>• What makes me a fish or a bird?</li> <li>• Structural adaptations</li> <li>• Aboriginal People's knowledge of adaptations.</li> <li>• Extreme environments.</li> <li>• Adaptations for Australian environments.</li> <li>• Adaptation and climate change.</li> </ul>	<ul style="list-style-type: none"> <li>• Students will establish an understanding of the function of adaptations, both plant and animals. Page 7</li> <li>• Students will identify the body parts of fish and birds and understand how these structural features help the animals survive in its environment. Page 8</li> <li>• Students will identify and understand how different structural adaptations help animals survive in their environment. Page 10</li> <li>• Students will investigate Aboriginal People's knowledge of the adaptations of certain species and how those adaptations can be exploited for other purposes. Page 13</li> <li>• Students will explore and understand that adaptations help animals survive in extreme environments. Page 16</li> <li>• Students will investigate and understand various adaptations of species surviving in Australian environments. Page 18</li> </ul>	<ul style="list-style-type: none"> <li>• Animal Coverings</li> <li>• Animal Coverings Kit 2</li> <li>• Birds activity 1</li> <li>• Birds Activity 2</li> <li>• Birds and Beaks</li> <li>• Birds – Grasslands and Open Forests</li> <li>• Birds – Parrots</li> <li>• Birds of Prey 1</li> <li>• Birds of Prey 2</li> <li>• Bites and Stings</li> <li>• Camouflage</li> <li>• Feathers</li> <li>• Flight</li> <li>• Habitat</li> <li>• Mammals – Australian</li> <li>• Mini Beasts, Kits 1 to 4</li> <li>• Polar/Antarctic and petrel skeleton</li> <li>• Spiders and other Mini Beasts</li> </ul>	Page 8: Activity on Birds with different beaks and Fish – different swimming styles. Build-A-Fish activity – reef fish

6	Life's needy	Let's explore!  Ferals	<ul style="list-style-type: none"> <li>• Students will conduct an environmental survey of a local area and understand how the features of the environment support plant and animal growth. Page 6</li> <li>• Students will explore and understand the impact that introduced species have on Australian native species. Page 14</li> </ul>	<ul style="list-style-type: none"> <li>• Ferals</li> <li>• Endangered Species</li> </ul>	•
	Don't Panic	Tell me about earthquakes.  Are we related?	<ul style="list-style-type: none"> <li>• Students understand earthquakes are caused by sudden geological changes in the Earth's surface and can describe the similarities and differences between various scales used to measure earthquake strength. Page 12</li> <li>• Students will investigate and understand the cause of volcanic eruptions and tsunamis. Page 15</li> </ul>	<ul style="list-style-type: none"> <li>• Volcanoes, Earthquakes and Moving Continents</li> </ul>	•

Year	Unit Title	Unit Sequence Title	Learning Intentions	Kit Titles
7	Classification of living things	<ul style="list-style-type: none"> <li>• Introduction to classification.</li> <li>• Classification of organisms using Aboriginal knowledges</li> <li>• Making meaning of scientific language.</li> <li>• Creating dichotomous keys.</li> <li>• Using dichotomous keys.</li> <li>• Classification of animal phylum vertebrates.</li> <li>• Classification of animal phyla invertebrates.</li> </ul>	<ul style="list-style-type: none"> <li>• Students learn how to sort, organise, and order to form patterns of living things. Page 8</li> <li>• Students learn how Aboriginal Peoples classify living things based on context and usage. Page 12</li> <li>• Students learn the pattern of science vocabulary and to support naming species using binomial nomenclature. Page 14</li> <li>• Students learn the conventions for constructing a dichotomous key and modifying when a new organism is discovered. Page 16</li> <li>• Students interpret a dichotomous key to draw an organism Page 18</li> <li>• Students learn how to classify vertebrates on a field trip.... And design an enclosure for an animal. Page 19</li> <li>• Students learn to classify invertebrates. Page 20</li> </ul>	<ul style="list-style-type: none"> <li>• Animal Phyla/Evolution</li> <li>• Classification Kit 1</li> <li>• Classification 2</li> <li>• Classification 3</li> <li>• Classification Kits 4 and 5 – includes invertebrates.</li> <li>• Birds Activities Kit 1 – uses birds names.</li> <li>• Bird Kit 1 – variety of birds with their names</li> <li>• Habitat – preserved items</li> <li>• Insect Kits 1, 2, 3 and 4</li> <li>• Mini Beasts Kits 1, 2, and 4</li> <li>• Mini Beasts 3 – uses phyla and order classifications.</li> <li>• Shells Kit 1 – very detailed</li> <li>• Southern Australian Shells</li> </ul>
	Food chains and food webs	<ul style="list-style-type: none"> <li>• Introduction to relationships between living things</li> <li>• Food chains and food webs show feeding relationships.</li> <li>• Flow of energy and matter.</li> <li>• Food webs show the interconnectedness between living things in a habitat.</li> <li>• Invasive species and biological control.</li> </ul>	<ul style="list-style-type: none"> <li>• Students are able to identify living things and propose relationships within a local habitat. Page 9</li> <li>• Students explore food chains and food webs to represent feeding relationships in a food web. Page 18</li> <li>• Students explore food chains and food webs to show how energy and mass flow through an environment. Page 19</li> <li>• Students explore interconnections between living things. Page 20</li> <li>• Students will learn about invasive species and explore the use of biological controls. Page 23</li> </ul>	<ul style="list-style-type: none"> <li>• Habitats Any of the kits below can be used to show ecological relationships and the organism therein can be used to construct food webs and food chains.</li> <li>• Arid lands</li> <li>• Rainforest Kit</li> <li>• Reef and Rockpool Kit</li> <li>• Wetlands Kit</li> <li>• Mangroves Kit</li> </ul>
